SAAD ABDULLAH

Senior Software Engineer | Full-Stack Developer | AI-Enabled Systems

Lahore, Pakistan • 0320-7480116 • saadirebot@gmail.com

PROFESSIONAL SUMMARY

Senior Software Engineer with over 6 years of experience specializing in mission-critical, full-stack applications and enterprise ERP architecture. Proven track record of delivering high-accuracy, secure systems using ReactJS, Next.js, and Node.js across diverse sectors including housing management and defense. Expert in Agentic AI (LangChain), biometric integration, and AES encryption. Adept at leading cross-functional teams and managing complex data migrations with zero data loss

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript (Working Proficiency), Python

Frontend: ReactJS, Next.js, React Native, Tailwind CSS, Electron Backend: Node.js, Express, NestJS (Familiar), REST APIs

Databases: Oracle, MySQL, PostgreSQL, MongoDB, SQLite, Prisma ORM

AI & Security: Agentic AI (LangChain), Biometric Systems, AES-256 Encryption

Tools & DevOps: Git, Docker, AWS, Vercel, DigitalOcean, Network Administration

PROFESSIONAL EXPERIENCE

IT Officer / Lead Developer | JSHIS – Askari 11, Lahore *March 2025 – Present*

JSHIS Mobile / Web Application

- Designed and deployed a cross-platform ERP system for full colony management covering thousands of residents
- Built modules for rent management, billing, online payments, resident complaints, and reporting dashboards
- Implemented a secure visitor and domestic worker management system with real-time tracking
- Achieved 99% system accuracy, significantly improving administrative efficiency across departments
- **Tech stack**: ReactJS, React Native, Node.js, Oracle, MySQL

JSHIS Security Renewal & Rent Management System

- **Desktop Engineering:** Built a standalone offline-first Windows executable (.exe) using Electron with persistent local SQLite storage, eliminating server dependency for field operations
- **Data Integrity:** Engineered an Upsert logic processing engine that cleaned and merged multi-month datasets (Feb–Apr 2026) with zero data loss or duplication across records
- **Billing Automation:** Developed an automated Monthly Distribution engine that generates printable billing lists and tracks total expected rent collection per housing block
- **UX/UI:** Integrated Sonner for global toast notifications and optimized application startup synchronization, achieving zero load latency on cold start
- **Tech Stack:** React (Hooks, Router), Tailwind CSS, Lucide Icons, Node.js, Express, Prisma ORM, SQLite, Electron Builder, NSIS Toolchain, Git, REST API Design

IT Officer (ITO) | Artillery Center, Attock *June 2020 – February 2025*

- Built a nationwide recruit management system using Next.js and MySQL, reducing manual processing time by ~70%
- Developed an officer evaluation and grooming system for structured performance tracking and reporting
- Created a Python-based biometric attendance system integrated with enterprise HR workflows
- Implemented AES-256 encryption for secure image and sensitive data handling across systems
- Managed nationwide enterprise network infrastructure, automation, and system reliability

Junior Software Engineer | ITHub, Sargodha *January 2019 – May 2020*

- Developed POS and inventory management systems for multiple retail clients
- Contributed feature enhancements to the University of Sargodha's web portal
- Mentored final-year CS/IT students on production-level software development practices

FREELANCE PROJECTS

Lift Management System

- Designed and developed a comprehensive management portal for tracking elevator maintenance, service logs, and real-time status updates.
- Implemented a robust backend to handle scheduling and technician dispatching.
- **Tech Stack:** React, Node.js, PostgreSQL

School Management System | APS Attock

- Built a centralized educational ERP to manage student enrollment, fee collection, and academic grading for Army Public School (APS) Attock.
- Streamlined administrative workflows by automating report card generation and attendance tracking.
- **Tech Stack:** React, Node.js, MySQL

Tailoring Management System

- Developed a specialized POS and order-tracking system for tailoring businesses, focusing on measurement recording and delivery scheduling.
- Integrated a lightweight, offline-ready database for fast performance in retail environments.
- **Tech Stack:** React, Node.js, SQLite

EDUCATION

Bachelor of Science in Software Engineering *2014 – 2018*

University of Sargodha (UOS)

CERTIFICATIONS

- Microsoft Certified Professional

KEY STRENGTHS

Enterprise ERP Architecture • Secure System Design • Full-Stack Mobile Development • Agentic AI Integration • Team Leadership • Mission-Critical Delivery
